

About Us

Dai Power: – I work for Sustainable Swansea on the Digital Media project. I am based at the Environment Centre, and work with community groups to help them and their local area become more sustainable. Together we are making a Green Map; I provide the resources such as laptops and digital cameras, training in how to use them, and the participants record information about the resources in their area and put it all on an online map.

Delyth Higgins - Works for Sustainable Swansea on the Trailblazers I Project and the Morrision Carbon Footprinting Project.
